Groundhog Day is celebrated in the U. S. each year on February 2.

On this day, the groundhog awakens from a long winter's nap, and goes outside to see if he sees his shadow.

According to legend, if the groundhog sees his shadow, there will be six more weeks of winter. If however, he does not see his shadow, then spring is said to be just around the corner.

Are you ready for spring or more winter ??

Students in Ms. Streu's class recognized the 100th day of school by participating in several learning activities with the theme **100**. The students pictured below are using their favorite snacks to count to 100.
